

ULTRA CBD™

EXPERIENCE THE DIFFERENCE

The UltraCBD™ team takes great pride in using the highest quality hemp oil extract from industrial hemp ensuring that our product has the best possible flavoring while maintaining the effects of a high-CBD supplement.

UltraCBD™ 200mg cannabinoid supplement is prepared in a certified Good Manufacturing Practices facility. All ingredients and lots are tested for e.coli, staph, total plate count, coliforms, salmonella, and are tested against industry standard quality control measures. An FDA Required Microbiological & ID Testing Final QC is also required before the final product can leave the facility. Independent third party lab tests are also available on our website.

The UltraCBD™ team is vested heavily in the manufacturing process and is fully committed to providing you with the best and safest cannabinoid supplement you can buy at a fair price. You can rest assured that UltraCBD™ is made in an FDA-approved lab environment to the highest standards and is thoroughly tested and sealed with a glass dropper for exact dosing, the expiration date and lot # stamped on each and every bottle.

QUALITY CONTROL

Quality control is #1 in our manufacturing process. Our production team oversees quality control. Hair nets, masks, gloves, booties and lab coats are worn at every step from formulation to bottling.

MANUFACTURING FACILITY

Each bottle label shows supplement facts, dosing directions as well as the lot number and expiration date stamped on the bottom of each bottle. Each bottle of UltraCBD™ dietary supplement has a 18 month shelf life.

MIXING STATION

UltraCBD™ is made at a certified Good Manufacturing Practices facility. Type 304 food grade cylinders are the norm for all formulations. Our facility's production systems are designed to eliminate human errors.
